Berkshire shutters installation

Our installer was really pleased to head out to this Berkshire home at the beginning of 2015 to install these classic white wooden shutters for an existing customer. Often we find that new customers will opt for having us fit one or two windows with our interior product, then call back a while later when they have seen the quality of our work and had a number of compliments on how our shutters look! We are always very happy to return to existing customer homes as they know how we like our tea!

Remodelled Kitchen:

Our lovely customer was in the process of having a kitchen remodel and having used London Shutters for a previous installation of interior shutters in their bedroom, we were the first port of call for the final touch in the beautiful new kitchen.

Shutters are a great way to create a private and modern environment in the home and they also provide an easy to clean solution for windows which are in easy reach of splashing taps like here in Berkshire. Easy to wipe off and coated with UV resistant paints, they are an easy choice for the modern family home.

Classic white broad slats were chosen in this design, using exposed pushrods for easy opening and closing of the slats when reaching across the worktop to the window. Beautiful matching white hinges also allow the shutters to be swung open for easy access to the window itself.

We think our product was the right choice and judging by the excellent reception we received, we are happy to report our customer felt the same way! Visit our website to find out more about us and our long established company.
